

Use Two Large Blocks
on the flat side at each
corner
Optional one small
Block on Flat side
Make sure you use
rebar stakes that come
with the unit at the end
of the block as per
instructions Manual to
help secure Brace and
Block to the ground

Use Three Large Blocks on angle side at each upright
The Angle side has two chambers. Small chamber with a
hole and chamber from side to side .
Insert the Beam support inside the small angle chamber and
the 4x4 Bottom Brace from one end to other

Make sure you use rebar stakes – Example Below
